It is important to take medications exactly as the doctor prescribes them. A medication log can help you to track the medication schedule and be sure that your loved one doesn't miss a dose. If he or she does miss a dose, call the prescribing doctor or the pharmacist for instructions. Let the healthcare team know immediately if there are any side effects that result from taking a medicine. Make sure the healthcare team is told about any supplements, vitamins, or over-the-counter medications the patient takes.
